INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and City Council Members of the City of Shoreacres, Texas:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and the major funds of the City of Shoreacres, Texas (the "City") as of and for the year ended September 30, 2017, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the City's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and the major funds of the City as of September 30, 2017, and the respective changes in financial position and where applicable, cash flows thereof for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, budgetary comparison information, schedule of changes in net pension liability and related ratios, and schedule of contributions, identified as Required Supplementary Information on the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the Required Supplementary Information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

BELT HARRIS PECHACEK, LLLP

MANAGEMENT'S DISCUSSION AND ANALYSIS

MANAGEMENT'S DISCUSSION AND ANALYSIS

For the Year Ended September 30, 2017

The purpose of the Management's Discussion and Analysis (MD&A) is to give the readers an objective and easily readable analysis of the financial activities of the City of Shoreacres (the "City") for the year ending September 30, 2017. The analysis is based on currently known facts, decisions, or economic conditions. It presents short and long-term analysis of the City's activities, compares current year results with those of the prior year, and discusses the positive and negative aspects of that comparison. Please read the MD&A in conjunction with the City's financial statements, which follow this section.

THE STRUCTURE OF OUR ANNUAL REPORT

The City's basic financial statements include (1) government-wide financial statements, (2) individual fund financial statements, and (3) notes to the financial statements.

Government-Wide Statements

The government-wide statements report information for the City as a whole. These statements include transactions and balances relating to all assets, including infrastructure capital assets. These statements are designed to provide information about cost of services, operating results, and financial position of the City as an economic entity. The Statement of Net Position and the Statement of Activities, which appear first in the City's financial statements, report information on the City's activities that enable the reader to understand the financial condition of the City. These statements are prepared using the *accrual basis of accounting*, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account even if cash has not yet changed hands.

The Statement of Net Position presents information on all of the City's assets, liabilities, and deferred outflows/inflows of resources, with the difference reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating. Other nonfinancial factors, such as the City's property tax base and the condition of the City's infrastructure, need to be considered in order to assess the overall health of the City.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)
For the Year Ended September 30, 2017

The Statement of Activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows – the accrual method rather than modified accrual that is used in the fund level statements.

The Statement of Net Position and the Statement of Activities divide the City's financials into two classes of activities:

- 1. Governmental Activities Most of the City's basic services are reported here, including public safety (police), public works, municipal court, culture and recreation, and general government. Sales tax, property tax, franchise taxes, municipal court fines, and permit fees finance most of these activities.
- 2. Business-Type Activities Services involving a fee for those services are reported here. These services include the City's water, sewer, and sanitation services.

The government-wide financial statements can be found after the MD&A within this report.

FUND FINANCIAL STATEMENTS

Funds may be considered as operating companies of the parent corporation, which is the City. They are usually segregated for specific activities or objectives. The City uses fund accounting to ensure and demonstrate compliance with finance-related legal reporting requirements. The two categories of City funds are governmental and proprietary.

Governmental Funds

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating the City's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the City's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City maintains one individual governmental fund. Information is presented in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund, which is always considered to be a major fund for reporting purposes.

The City adopts an annual appropriated budget for its general fund. A budgetary comparison schedule has been provided for the general fund to demonstrate compliance with this budget.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)
For the Year Ended September 30, 2017

Proprietary Funds

The City maintains one type of proprietary fund. The enterprise fund is used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses an enterprise fund to account for its water, sewer, and sanitation operations. The basic proprietary fund financial statements can be found in the basic financial statements of this report.

Notes to Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes are the last section of the basic financial statements.

Other Information

In addition to the financial statements, MD&A, and accompanying notes, this report also presents certain Required Supplementary Information (RSI). The RSI includes a budgetary comparison schedule for the general fund and a schedule of changes in net pension liability and related ratios and a schedule of contributions for the Texas Municipal Retirement System. RSI can be found after the notes to the basic financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As noted earlier, net position may serve over time as a useful indicator of the City's financial position. For the City, assets and deferred outflows of resources exceed liabilities and deferred inflows of resources by \$9,312,634 as of year end. This compares with \$9,635,199 from the prior fiscal year. The largest portion of the City's net position, 85 percent, reflects its investments in capital assets (e.g., land, City hall, police station, fleet equipment, drainage systems, as well as the public works facilities), less any debt used to acquire those assets that is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)
For the Year Ended September 30, 2017

Statement of Net Position:

The following table provides a condensed Statement of Net Position:

	2017					2016						
		vernmental Activities	Business-Type Activities		Total		Governmental Activities		Business-Type Activities			Total

A portion of net position, less than one percent, is restricted for specific purposes. The remaining balance of unrestricted net position, \$1,377,073 or 15 percent, may be used to meet the City's ongoing obligation to citizens and creditors.

As of September 30, 2017, the City reported deferred outflows and inflows of resources related to its pension plan of \$106,306 and \$32,156 respectively. In addition, the City reported a net pension asset of \$29,109. The detail of these amounts is further discussed in the notes to the financial statements.

	Ending Net Position	\$ 6,598,813	\$ 2,713,821		\$ 7,034,714					

The City's net position decreased by \$322,565 during the current fiscal year. This net change can be attributed to several factors. Total revenues increased by \$96,292 primarily due to an increase other revenues. Other revenues for governmental activities increased over the prior year as a result of park donations for Miramar Park. Total expenses decreased by \$105,949 due to decreases in general government, water and sewer, and sanitation expenses. Water and sewer maintenance costs were higher in the prior year as a result of a sewer line collapse.

Total revenues for the governmental activities increased by five percent when compared to the previous year. This increase is attributable to both an increase in operating grants, as well as other revenues. Operating grants were related to funds received as a part of a Coastal Impact Assistance Program with Harris County for the shoreline restoration project at Miramar park to develop a shoreline protection plan. Expenses were comparable to the prior year, increasing just 3 percent compared to the previous year.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)
For the Year Ended September 30, 2017

Overall, business-type activity revenues increased by \$20,243 when compared to the previous year. This increase in revenue is attributable to increases in charges for services. Expenses decreased \$168,712 due primarily to less maintenance costs in fiscal year 2017.

FINANCIAL ANALYSIS OF THE CITY'S FUNDS

As noted earlier, fund accounting is used to demonstrate and ensure compliance with finance-related legal requirements.

Governmental Funds — The focus of the City's governmental fund is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, the unassigned fund balance may serve as a useful measure of the City's net resources available for spending at the end of the fiscal year.

The general fund is the chief operating fund of the City. There was a decrease in the fund balance of \$60,267 from the prior year. The decrease is due to a transfer to the utility fund. As a measure of the general fund's liquidity, it may be useful to compare total fund balance to total fund expenditures. Total general fund balance represents 57 percent of total general fund expenditures.

Total revenues and expenditures for the general fund were comparable to the prior year. The decrease in fines and forfeitures was partially offset by the increase in other revenues. Fines and forfeitures fluctuate based on the number of citations written. Additionally, the City was without a court clerk for three months of the 2017 fiscal year. Other revenues included donations received for Miramar Park.

Proprietary Funds – The City's proprietary funds financial statements provide the same type of information found in the government-wide financial statements, but in more detail.

GENERAL FUND BUDGETARY HIGHLIGHTS

Total actual revenues were more than budgeted general fund revenues by a net \$51,930. The largest positive variance was related to intergovernmental revenue received for the shoreline restoration project to develop a shoreline protection plan. Fines and forfeitures had the largest negative variance. This variance can be attributed to staff vacancies, a new legislative law providing defendants with more time to settle their citation(s), and an increase in the election to take defensive driving for moving violations, which results in less funds received for the City. Actual expenditures were \$51,756 less than budgeted expenditures.

CAPITAL ASSETS

At the end fiscal year 2017, the City's governmental and business-type activities had invested \$7,916,033 in a variety of capital assets and infrastructure (net of depreciation). This represents a net decrease of \$563,857.

Major capital asset events during the year included the following:

• Park improvements of \$58,111

More detailed information about the City's capital assets is presented in note III.C. to the financial statements.

LONG-TERM DEBT

At the end of the current year, the City reported \$104,886 in compensated absences as a long-term liability.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)
For the Year Ended September 30, 2017

More detailed information about the City's long-term liabilities is presented in note III.D. to the financial statements.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET

The City's budgeted expenditures for fiscal year 2018 total \$1,536,712 in the general fund and \$602,761 in the water and sewer fund. The City Council adopted a 2017 tax rate of \$0.785505 per \$100 valuation.

CONTACTING THE CITY'S FINANCIAL MANAGEMENT

This financial report is designed to provide a general overview of the finances of the City. Questions concerning this report or requests for additional financial information should be directed to the City Manager, City of Shoreacres, 601 Shore Acres Boulevard, Shoreacres, Texas, 77571 or call (281) 471-2244.

NOTES TO FINANCIAL STATEMENTS
For the Year Ended September 30, 2017

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The City of Shoreacres, Texas (the "City") was incorporated under the laws of the State of Texas in 1949. The City is a "General Law City", with a Mayor and five Council members elected to two-year terms. City Hall functions as a courthouse, Council chambers, meeting room, and administrative building.

The City provides the following services: public safety including police, fire, and emergency medical services; public works; municipal court services; culture and recreation; water, sewer and sanitation services; and general administration, including permits and inspections.

The City is an independent political subdivision of the State of Texas governed by an elected council and a mayor and is considered a primary government. As required by generally accepted accounting principles, these basic financial statements have been prepared based on considerations regarding the potential for inclusion of other entities, organizations, or functions as part of the City's financial reporting entity. No other entities have been included in the City's reporting entity. Additionally, as the City is considered a primary government for financial reporting purposes, its activities are not considered a part of any other governmental or other type of reporting entity.

Considerations regarding the potential for inclusion of other entities, organizations, or functions in the City's financial reporting entity are based on criteria prescribed by generally accepted accounting principles. These same criteria are evaluated in considering whether the City is a part of any other governmental or other type of reporting entity. The overriding elements associated with prescribed criteria considered in determining that the City's financial reporting entity status is that of a primary government are that it has a separately elected governing body, it is legally separate, and it is fiscally independent of other state and local governments. Additionally, prescribed criteria under generally accepted accounting principles include considerations pertaining to organizations for which the primary government is financially accountable, and considerations pertaining to organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

B. Government-Wide Financial Statements

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all activities of the primary government. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges to external customers for support.

C. Basis of Presentation – Government-Wide Financial Statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds, while business-type activities incorporate data from the City's enterprise funds. Separate financial statements are provided for governmental funds and proprietary funds.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments in lieu of taxes where the amounts are reasonably equivalent in value to the interfund services provided and other charges between the City's water and wastewater functions and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

NOTES TO FINANCIAL STATEMENTS (Continued)

For the Year Ended September 30, 2017

D. Basis of Presentation – Fund Financial Statements

The fund financial statements provide information about the City's funds. Separate statements for each fund category - governmental and proprietary - are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column.

The City reports the following governmental fund:

The general fund is used to account for and report all financial resources not accounted for and reported in another fund. The principal sources of revenues include local property taxes, sales and franchise taxes, fines and forfeitures, as well as licenses and permits. Expenditures include general government, public safety, public works, municipal court, and culture and recreation. The general fund is always considered a major fund for reporting purposes.

The City reports the following enterprise fund:

The enterprise fund is used to account for and report the operations that provide water, sewer, and sanitation services. These services are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses including depreciation) of providing goods or services to the general public on a continuing basis will be financed or recovered primarily through user charges. The utility fund is considered a major fund for reporting purposes.

During the course of operations, the City has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column. Similarly, balances between the funds included in business-type activities (i.e., the enterprise funds) are eliminated so that only the net amount is included as internal balances in the business-type activities column.

Further, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements, these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column. Similarly, balances between the funds included in business-type activities are eliminated so that only the net amount is included as internal balances in the business-type activities column.

E. Measurement Focus and Basis of Accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as current financial resources or economic resources. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide and proprietary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are

NOTES TO FINANCIAL STATEMENTS (Continued)

For the Year Ended September 30, 2017

recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital leases are reported as other financing sources.

Property taxes, sales taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements are recorded as revenues when all eligibility requirements are met, including any time requirements, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year end). Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year end). All other revenue items are considered to be measurable and available only when cash is received by the City.

F. Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance

1. Cash and Cash Equivalents

The City's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. For the purpose of the statement of cash flows, the proprietary fund type considers temporary investments with maturity of three months or less when purchased to be cash equivalents.

2. Investments

The City reports all investments at fair value, except for certain investment pools and money market investments. Money market investments, which are short-term highly liquid debt instruments that may include U.S. Treasury and agency obligations, are reported at amortized costs. Investments in nonparticipating interest earning contracts, such as certificates of deposit, are reported at cost. The investment pool operates in accordance with appropriate state laws and regulations and is reported at amortized cost.

The City has adopted a written investment policy regarding the investment of its funds as defined in the Public Funds Investment Act, Chapter 2256, Texas Government Code.

3. Inventories and Prepaid Items

The costs of governmental fund type inventories are recorded as expenditures when the related liability is incurred (i.e., the purchase method).

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

Certain payments to vendors reflecting costs applicable to the future accounting period (prepaid expenditures) are recognized as expenditures when utilized.

4. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of three years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at acquisition value at the date of donation. Major outlays for capital assets and improvements are capitalized as projects are constructed.

The City chose not to report general infrastructure assets retroactively, as permitted by GASB Statement No. 34 for smaller governments. The City will prospectively report general infrastructure assets acquired or constructed after October 1, 2003 in the Statement of Net Position in the period they acquire or construct those assets.

Interest costs incurred in connection with the construction of enterprise fund capital assets are capitalized when the effects of capitalization materially impact the financial statements.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Property, plant, and equipment of the primary government are depreciated using the straight-line method over the following estimated useful years:

Asset Description	Us eful Life
Buildings and improvements	10 to 30 years
Machinery and equipment	3 to 20 years
Water facilities	20 to 40 years
Vehicles	5 years
Infrastructure	20 to 30 years

5. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The City has three items that qualify for reporting in this category on the government-wide Statement of Net Position. Deferred outflows of resources are recognized as a result of the difference between the projected and actual investment earnings on the pension plan assets. This amount is deferred and amortized over a period of five years. Deferred charges have been recognized as a result of changes in actuarial assumptions related to the City's defined benefit pension plan. This amount is deferred and amortized over the average of the expected service lives of pension plan members. A deferred charge has been recognized for employer pension plan contributions that were made subsequent to the measurement date through the end of the City's fiscal year. This amount is deferred and recognized as an increase to the net pension asset during the measurement period in which the contributions were made.

NOTES TO FINANCIAL STATEMENTS (Continued)

For the Year Ended September 30, 2017

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The City has one item that qualifies for reporting in this category in the government-wide Statement of Net Position. Deferred inflows of resources are recognized as a result of differences between the actuarial expectations and the actual economic experience related to the City's defined benefit pension plan. This amount is deferred and amortized over the average of the expected service lives of pension plan members. At the fund level, the City has only one type of item, which arises only under a modified accrual basis of accounting, that qualifies for reporting in this category. Accordingly, the item, unavailable revenue, is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from property taxes and municipal court revenue. These amounts are deferred and recognized as an inflow of resources in the period that the amount becomes available.

6. Compensated Employee Absences

Employees earn vacation time based on years of service with the City, up to a maximum of 20 days per year. Employees may accrue up to a maximum of 30 days of vacation time. Upon termination of employment, any unused vacation time is paid as part of the final paycheck.

Sick leave accrues on the basis of one day per month of employment. A maximum of 65 days may be accrued. Employees are granted sick pay only for actual sick time. Payment for no more than 160 hours for sick leave accrued with two years or more of continued employment with the City will be paid upon resignation, retirement, or in case of death, paid to the estate. The estimated amount that will be paid as compensation for services provided is recorded as a liability in the Statement of Net Position. All eligible time is accrued when incurred in the government-wide and proprietary fund financial statements.

7. Long-Term Obligations

In government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type Statement of Net Position.

8. Net Position Flow Assumption

Sometimes the City will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the City's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

9. Fund Balance Flow Assumptions

Sometimes the City will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the City's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

10. Fund Balance Policies

Fund balances of governmental funds are reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The City itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

Amounts that cannot be spent because they are either not in spendable form or legally or contractually required to be maintained intact are classified as nonspendable fund balance. Amounts that are externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or imposed by law through constitutional provisions are classified as restricted.

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the City's highest level of decision-making authority. The City Council is the highest level of decision-making authority for the City that can, by adoption of a resolution prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the resolution remains in place until a similar action is taken (the adoption of another resolution) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the City for specific purposes but do not meet the criteria to be classified as committed. The City Council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

11. Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

12. Pensions

For the purposes of measuring the net pension liability/(asset), deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Texas Municipal Retirement System (TMRS) and additions to/deductions from TMRS's fiduciary net position have been determined on the same basis as they are reported by TMRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

G. Revenues and Expenditures/Expenses

1. Property Taxes

Property taxes are levied during September of each year, are due upon receipt of the City's tax bill, and become delinquent on February 1 of the following year. The City's tax lien exists from January 1 (the assessment date) each year until the taxes are paid.

2. Proprietary Funds Operating and Nonoperating Revenues and Expenses

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise fund are charges to customers for sales and services. The enterprise fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

II. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

A. Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles. Prior to the beginning of each fiscal year, the City Administrator submits to the City Council a proposed budget for the general and water and sewer fund. The City Council uses this as a basis to formulate the operating budget for the upcoming year, which includes proposed expenditures and the means of financing those expenditures.

Public hearings are conducted at which all interested persons' comments concerning the budget are heard. The budget is legally enacted by the City Council. Budgetary control is maintained at the fund level. All annual appropriations lapse at fiscal year-end.

B. Expenditures in Excess of Appropriations

Expenditures exceeded appropriations at the legal level of control within the general fund for culture and recreation in the amount of \$123,306 as well as transfers out in the amount of \$66,750.

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

III. DETAILED NOTES ON ALL FUNDS

A. Deposits and Investments

Cash and temporary investments include petty cash on hand in various departments and demand deposit accounts. As of yearend, the City had the following investments:

		Weighted Average
Investment Type	Value	Maturity (Years)
Certificates of deposit	\$ 249,987	1.18
TexPool	413,123	N/A
	\$ 663,110	
Portfolio		0.45

Concentration of credit risk. With the exception of U.S. Treasury securities, bond funds, and authorized pools, the City's investment policy does not allow for an investment in any one issuer that is in excess of 50 percent of the portfolio's total investments.

Custodial credit risk – deposits. In the case of deposits, this is the risk that in the event of a bank failure, the City's deposits may not be returned to it. The City's investment policy requires funds on deposit at the depository bank to be collateralized by securities with a collective market value of at least 102 percent. The Federal Deposit Insurance Corporation (FDIC) insures deposits held at banks and thrift institutions up to limited amounts. As of September 30, 2017, the City's deposits were fully insured.

Custodial credit risk – investments. For an investment, this is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City's investment policy requires that it will seek to safekeeping securities at financial institutions, avoiding physical possession. Further, all trades, where applicable, are executed by delivery versus payment to ensure that securities are deposited in the City's safekeeping account prior to the release of funds.

TexPool

TexPool was established as a trust company with the Treasurer of the State of Texas as trustee, segregated from all other trustees, investments, and activities of the trust company. The State Comptroller of Public Accounts exercises oversight responsibility over TexPool. Oversight includes the ability to significantly influence operations, designation of management, and accountability for fiscal matters. Additionally, the State Comptroller has established an advisory board composed of both participants in TexPool and other persons who do not have a business relationship with TexPool. The advisory board members review the investment policy and management fee structure. Finally, Standard & Poor's rates TexPool 'AAAm'. As a requirement to maintain the rating, weekly portfolio information must be submitted to Standard & Poor's, as well as to the office of the Comptroller of Public Accounts for review.

TexPool is an external investment pool measured at amortized cost. In order to meet the criteria to be recorded at amortized cost, the investment pool must transact at a stable net asset value per share and maintain certain maturity, quality, liquidity, and diversification requirements within TexPool. TexPool transacts at a net asset value of \$1.00 per share, has weighted average maturities of 60 days or less, and weighted average lives of 120 days or less. Investments held are highly rated by nationally recognized statistical rating organizations, have no more than five percent of portfolio with one issuer (excluding U.S.

NOTES TO FINANCIAL STATEMENTS (Continued)

For the Year Ended September 30, 2017

government securities), and can meet reasonably foreseeable redemptions. TexPool has a redemption notice period of one day and may redeem daily. TexPool's authority may only impose restrictions on redemptions in the event of a general suspension of trading on major securities markets, general banking moratorium, or national state of emergency that affects TexPool's liquidity.

B. Receivables

The following comprise receivable balances at year end:

		Water and

Court accounts receivable		274,603		-		-		-
Court revenue deferred		(35,528)		-		-		-
Beginning net position/fund balance - restated	\$	7,034,714	\$	878,893	\$	2,600,485	\$	2,600,485

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

IV. OTHER INFORMATION

A. Risk Management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters for which the City participates along with 2,617 other entities in the Texas Municipal League's Intergovernmental Risk Pool (the "Pool"). The Pool purchases commercial insurance at a group rate for participants in the Pool. The City has no additional risk or responsibility to the Pool, outside of the payment of insurance premiums. The City has not significantly reduced insurance coverage or had settlements that exceeded coverage amounts for the past three fiscal years.

B. Contingent Liabilities

Amounts received or receivable from granting agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount of expenditures that may be disallowed by the grantor cannot be determined at this time, although the City expects such amounts, if any, to be immaterial.

The City is a defendant in several lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that resolution of these matters will not have a material adverse effect of the financial condition of the City.

Liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Claim liabilities are calculated considering the effects of inflation, recent claim settlement trends including frequency and amount of payouts, and other economic and social factors. No claim liabilities are reported at year end.

C. Pension Plan

Texas Municipal Retirement System

Plan Description

The City participates as one of 872 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the "TMRS Act") as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of TMRS with a six-member Board of Trustees (the "Board"). Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401(a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report that can be obtained at www.tmrs.com.

All eligible employees of the City are required to participate in TMRS.

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

Benefits Provided

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the City-financed monetary credits, with interest, were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven payment options. Members may also choose to receive a portion of their benefit as a partial lump sum distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75 percent of the member's deposits and interest.

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows:

	2017	2016
Employee deposit rate	5.00%	5.00%
Matching ratio (City to employee)	1.5 to 1	1.5 to 1
Years required for vesting	5	5
Service requirement eligibility		
(expressed as age/yrs of service)	60/5, 0/20	60/5, 0/20
Updated service credit	100% Repeating, Transfers	100% Repeating, Transfers
Annuity increase (to retirees)	70% of CPI	70% of CPI

Employees Covered by Benefit Terms

At the December 31, 2016 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	6
Inactive employees entitled to, but not yet receiving, benefits	18
Active employees	11
To	tal 35

Contributions

The contribution rates for employees in TMRS are either five percent, six percent, or seven percent of employee gross earnings, and the City-matching percentages are either 100 percent, 150 percent, or 200 percent, both as adopted by the governing body of the City. Under the state law governing TMRS, the contribution rate for each city is determined annually by the actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City were required to contribute five percent of their annual gross earnings during the fiscal year. The contribution rates for the City were 5.20 percent and 5.65 percent in calendar years 2016 and 2017, respectively. The City's contributions to TMRS for the fiscal year ended September 30, 2017 were \$37,269, which were equal to the required contributions.

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

Net Pension Liability (Asset)

The City's Net Pension Liability (Asset) (NPL(A)) was measured as of December 31, 2016 and the Total Pension Liability (TPL) used to calculate the NPL(A) was determined by an actuarial valuation as of that date.

Actuarial Assumptions

The TPL in the December 31, 2016 actuarial valuation was determined using the following actuarial assumptions:

Inflation 2.50% per year Overall payroll growth 3.00% per year

Investment rate of return 6.75%, net of pension plan investment expense, including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment, with male rates multiplied by 109 percent and female rates multiplied by 103 percent. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with male rates multiplied by 109 percent and female rates multiplied by 103 percent with a three-year set-forward for both males and females. In addition, a three percent minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the three percent floor.

Actuarial assumptions used in the December 31, 2016 valuation were based on the results of actuarial experience studies. The experience study in TMRS was for the period December 31, 2010 through December 31, 2014. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011 and dated December 31, 2013. These assumptions were first used in the December 31, 2013 valuation, along with a change to the EAN actuarial cost method. Assumptions are reviewed annually. Plan assets are managed on a total return basis with an emphasis on both capital appreciation, as well as the production of income, in order to satisfy the short-term and long-term funding needs of TMRS.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. In determining their best estimate of a recommended investment return assumption under the various alternative asset allocation portfolios, the actuary focused on the area between (1) arithmetic mean (aggressive) without an adjustment for time (conservative) and (2) the geometric mean (conservative) with an adjustment for time (aggressive).

NOTES TO FINANCIAL STATEMENTS (Continued)

For the Year Ended September 30, 2017

The target allocation and best estimates of real rates of return for each major asset class are summarized in the following table:

		Long-Term Expected Real
Asset Class	Target Allocation	nRate of Return (Arithmetic)
Domestic Equity	17.50%	4.55%
International Equity	17.50%	6.35%
Core Fixed Income	10.00%	1.00%
Non-Core Fixed Income	20.00%	4.15%
Real Return	10.00%	4.15%
Real Estate	10.00%	4.75%
Absolute Return	10.00%	4.00%
Private Equity	5.00%	7.75%
Total	100.00%	

Discount Rate

The discount rate used to measure the TPL was 6.75 percent. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the TPL.

Sensitivity of the NPL(A) to Changes in the Discount Rate

The following presents the NPL(A) of the City, calculated using the discount rate of 6.75 percent, as well as what the City's NPL(A) would be if it were calculated using a discount rate that is one percentage point lower (5.75%) or one percentage point higher (7.75%) than the current rate:

	1% Decrease in				1% Increase i			
	Discount Rate (5.75%)		Dis	count Rate	Di	scount Rate		
•				(6.75%)		(7.75%)		
City's Net Pension Liability (Asset)	\$	219,565	\$	(29,109)	\$	(229,962)		

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at www.tmrs.com.

Pension Expense and Deferred Outflows/Inflows of Resources Related to Pensions

For the fiscal year ended September 30, 2017, the City recognized net pension expense of \$53,731.

At September 30, 2017, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

Deferred

Defermed

		Oı	itflows of esources	Inflows of Resources		
Differences between expected and actual economic experience		\$	-	\$	32,156	
Changes in actuarial assumptions			9,495		-	
Net difference between projected and actual investment earnings			69,095		-	
Contributions subsequent to the measurement date			27,716		-	
	Total	\$	106,306	\$	32,156	

\$27,716 reported as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date will be recognized as a reduction/increase of the NPA for the fiscal year ending September 30, 2018. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended	Pension			
September 30	Expense			
2018	\$ 12,047			
2019	12,715			
2020	21,703			
2021	(31)			
Total	\$ 46,434			

NOTES TO FINANCIAL STATEMENTS (Continued)
For the Year Ended September 30, 2017

D. Other Post Employment Benefits

1. TMRS Supplemental Death Benefit Fund

Plan Description

The City also participates in the cost sharing multiple-employer defined benefit group-term life insurance plan operated by the TMRS known as the Supplemental Death Benefits Fund (SDBF). The City elected, by ordinance, to provide group-term life insurance coverage to both current and retired employees. The City may terminate coverage under and discontinue participation in the SDBF by adopting an ordinance before November 1 of any year to be effective the following January 1.

The death benefit for active employees provides a lump-sum payment approximately equal to the employee's annual salary (calculated based on the employee's actual earnings for the 12-month period preceding the month of death); retired employees are insured for \$7,500; this coverage is an "other post employment benefit," or OPEB. For the year ended September 30, 2017, the City offered the supplemental death benefit to both active and retired employees.

Contributions

The City contributes to the SDBF at a contractually required rate as determined by an annual actuarial valuation. The rate is equal to the cost of providing one-year term life insurance. The funding policy for the SDBF program is to assure that adequate resources are available to meet all death benefit payments for the upcoming year; the intent is not to pre-fund retiree term life insurance during employees' entire careers.

The City's contributions to the TMRS SDBF for fiscal years ended 2017, 2016, and 2015 were \$202, \$213, and \$185, respectively. The City's contribution rates for the past three years are shown below:

	2017	2016	2015
Annual Req. Contrib. (Rate)	0.03%	0.03%	0.03%
Actual Contribution Made	0.03%	0.03%	0.03%
